

*Ultralow Temperature and Low Power Consumption  
Beautiful Appearance and Good Safety*

## MEC-DB-150

### Narrow panel Electric Bolt Lock (Short panel)

#### PRODUCT OVERVIEW

Electric Bolt lock is kind of electric control locks, it works by means of extending or retracting the lock bolt with electric current. The VIANS Electric Bolt lock use the microprocessor chip to control electric circuit, so it decreases the power consumption and really has the ultralow temperature function. After 500000 times of test, we can assure our locks are more stable, more environmentally friendly and durable. Electric Bolt lock is designed mainly for glass door, wooden door and metal door, it is suitable for bidirectional door and sliding door, becomes the best choice of access control automation management.

#### ADVANTAGE OF THE PRODUCTS

- Photoelectric control technology, prevent mechanical failure.
- Ultra-low temperature design, Safer and more durable.
- More than 500000 working times.
- Ultra-low-power design, More durable and more environmentally friendly.
- Built-in reverse current and prevention device (MOV).
- High strength aluminum alloy lock body, stainless steel lock bolt.
- Products pass the EU CE and china MA qualified certification.
- Intelligent single chip configuration, three types current application.

#### SPECIFICATION

Model	:	MEC-DB-150
Product Type	:	Narrow panel Electric Bolt lock (Short panel)
Lock Size	:	148.5x24.5x39(mm)
Strike	:	148.5x24.5x20(mm)
Input Voltage	:	DC12V±10%
Working Current	:	80mA
Door Type Applicable	:	Wooden / Glass / Metal / Fireproof door
Time Delay	:	Yes
Signal output	:	Yes
Security Type	:	Locked when energized
Weight	:	0.86KG

#### INSTALLATION DRAWING

Exposed Installation

Embedded Installation
